# ORCHESTRATE INTEGRATION WITH ACCESS CONTROL MANAGER

## AUTOMATE SPECIFIC ACCESS CONTROL ACTIONS BASED ON ACM AND ORCHESTRATE TRIGGERS FOR INCREASED EFFICIENCY

The Access Control Manager (ACM™) integration with Orchestrate offers a workflow automation solution that helps with operational efficiencies and breaks down siloed technology barriers, allowing businesses to do more with less. Orchestrate is an intuitive cloud-based interface tool for administrators to configure and automate workflows that control their integrated security technology ecosystem.

When combining Orchestrate with ACM, users can easily automate a variety of access control actions, such as a lockdown activation, and reduce response time for increased security.

### INTEGRATED WORKFLOWS

- Real-time holistic creation and view of operations.
- Rule-based event triage.
- Secure connection across technology.

### ACCELERATE OPERATIONS

- Expedite detection & response.
- Reusable, standardized workflows.
- Cross-technology connections.
